

MEET. PARTNER. PROMOTE.

Wait! This is for real. Keep reading.

There's a new buzz word in the world of hearing conservation. Fit Testing!

It all comes together in Dallas, TX next August with participants from around the world, solely focused on Hearing Protector Fit Testing. Employers, policymakers, researchers, manufacturers, and (oh yes) all-important decision-makers - Safety Managers, Human Resource Managers, Product Distributors, Medical/Professional Overseers of Hearing Conservation Programs, Mobile Hearing Test Providers, et al.

Fit-Testing Systems are, quite possibly, the newest and most advanced innovation to come on the stage of hearing conservation since the advent of microprocessor audiometry.

The International Protector Fit-Testing Symposium will shine a spotlight on:

- Increasing knowledge regarding the evidence-based use of hearing protector fit testing,
- Identify supports and barriers to fit-testing implementation in-occupational settings and develop solutions for overcoming barriers, and
- Advance hearing protector fit testing as the rule in hearing loss prevention programs

. . . all with the goal of rapidly accelerating the personal benefits of hearing protector fit testing that will accomplish a significant leap forward in *effective* Hearing Conservation Programs.

You and those in your company's leadership have earned a solid reputation, fully ascribing to the virtues of preventing noise-induced hearing loss. Furthermore, to your credit, you readily recognize the many benefits your company stands to realize by agreeing to partner with us in this dynamic inaugural event that will not only make news but will be the news now and into the decade to follow.

We invite your company to be a visible presence at the center of what promises to be a five-star symposium, to experience the benefits of onsite name recognition that result in far-reaching benefits thereafter.

Partnering in the International Hearing Protector Fit-Testing Symposium
August 18-19, 2023 – Dallas, Texas

Review the Sponsorship and Exhibiting options that follow and then select the investment opportunity that will best serve to the advantage of your company's participation in this unprecedented one-time event.

Procedurally:

- a. Please indicate your intention to partner in the production of this symposium on/before March 1, 2023.
- b. Your timely response will greatly assist our endeavors as we facilitate the final arrangements and ensure your company is included in all registration communications and materials.
Email your selection(s) to: **nhcaoffice@hearingconservation.org**.
- c. After indicating your intention to partner, the arrangements for submitting the monetary transaction will follow thereafter by mutual agreement.

We welcome inquiries that will assist your decision-process to: **nhcaoffice@hearingconservation.org**

We can help put all eyes on your brand!

Why Sponsor?

Strengthening name recognition, increasing brand awareness, and gaining enhanced visibility among the hearing conservation industry are just some of the benefits that our sponsors will achieve at the International Hearing Protector Fit-Testing Symposium. We are pleased to offer exciting sponsorship opportunities that will drive more traffic to your website, provide unprecedented exposure, and secure your status as a hearing conservation front runner.

Sponsorship Benefits

The following are just a few of the benefits your organization will receive as a sponsor of the symposium or a collateral item:

- Early exposure on the International Hearing Protector Fit-Testing Symposium website
- Corporate recognition in press releases and event marketing collateral
- Onsite visibility among key decision-makers and influential industry leaders
- Relationship building with new and old customers
- Open new avenues of communication with prospective clients
- Networking and meeting opportunities with industry peers
